

# MTE 544 Technical Report

Assignment Title

Armaan Sengupta  
20991907

October 2, 2026

## Abstract

Summarize the purpose, method, main result, and conclusion of the report in approximately 100–200 words.

## Contents

|          |                              |          |

| <b>A</b> | <b>Additional Details</b>    | <b>2</b> |

## 1 Introduction

State the problem being investigated, its context, and the objectives of this report.

## 2 Background and Theory

Present the relevant theory, assumptions, and governing equations. For example,

$$y = mx + b, \tag{1}$$

where the variables and units should be defined in the surrounding text.

## 3 Methodology

Describe the analytical, experimental, or computational procedure clearly enough for the work to be reproduced. Include important parameter values, boundary conditions, and assumptions.

## 4 Results

Present the results using figures and tables. Refer to every figure and table in the text.

Table 1: Example results table. Replace the placeholder values.

| Case   | Measurement | Uncertainty |
|--------|-------------|-------------|
| Case 1 | –           | –           |
| Case 2 | –           | –           |

## 5 Discussion

Interpret the results, compare them with the expected behaviour or theory, and discuss uncertainty, limitations, and possible sources of error.

## 6 Conclusion

Summarize the main findings and state whether the report objectives were met.
